

sabaTEX

Product Profile

sabaTEX – The bulk polyester yarn for versatile use. Ideally suited for overedged seams and as looper and cover thread for cover seams. Effective for women's wear, men's fashion, underwear, work and sports wear. Its softness, volume and bulkiness provide a most pleasant seam and excellent coverage.

A colour range corresponding to the saba product line guarantees that all seam colours match in a model.

The colour numbers of the sabaTEX and the saba product line are identical. This provides for quick and convenient colour sampling.

The three **sabaTEX sizes 100 – 120 – 250** with their make-up and large range in colours have been fine-tuned to meet the requirements of the different fields of application:

sabaTEX 100

- Excellent coverage effect
- For robust overedged seams, for example on jeans or other casual wear
- Ideal for overedge and cover stitch seams
- Effective in multi-needle applications and as looper thread for double chain-stitch machines (mattress production).

Fields of use: Knit wear and jersey fabrics, swimming and sports wear, jeans, casual wear and home textiles (cushions, blankets, mattresses)

sabaTEX 120

- Universal bulk yarn
- Ideal as overlock thread
- Fine, soft seam with good coverage
- Pleasant-to-the-touch cover and overedge stitch seams
- Recommended as an under-thread for mattress quilting on double chain-stitch machines

Fields of use: Women's wear, men's fashion, work and sports wear, underwear, mattresses

sabaTEX 250

- The finest thread in the sabaTEX product line
- Extremely fine seams featuring an extraordinarily fine surface to prevent pressmarks

Fields of use: For all overlock seams on light, thin fabrics

sabaTEX is universally suited for all overlock and cover seam machines.
High sewing performance and an outstanding standard in quality provide perfect
sewability – even on very fast sewing machines.

Recommended needles for each product:

sabaTEX 100	needle NM 90-110
sabaTEX 120	needle NM 80 - 90
sabaTEX 250	needle NM 70 - 80

Environmentally sound manufacture

As with all AMANN GROUP sewing threads, sabaTEX is produced in accordance
with the most up-to-date environmental standards.

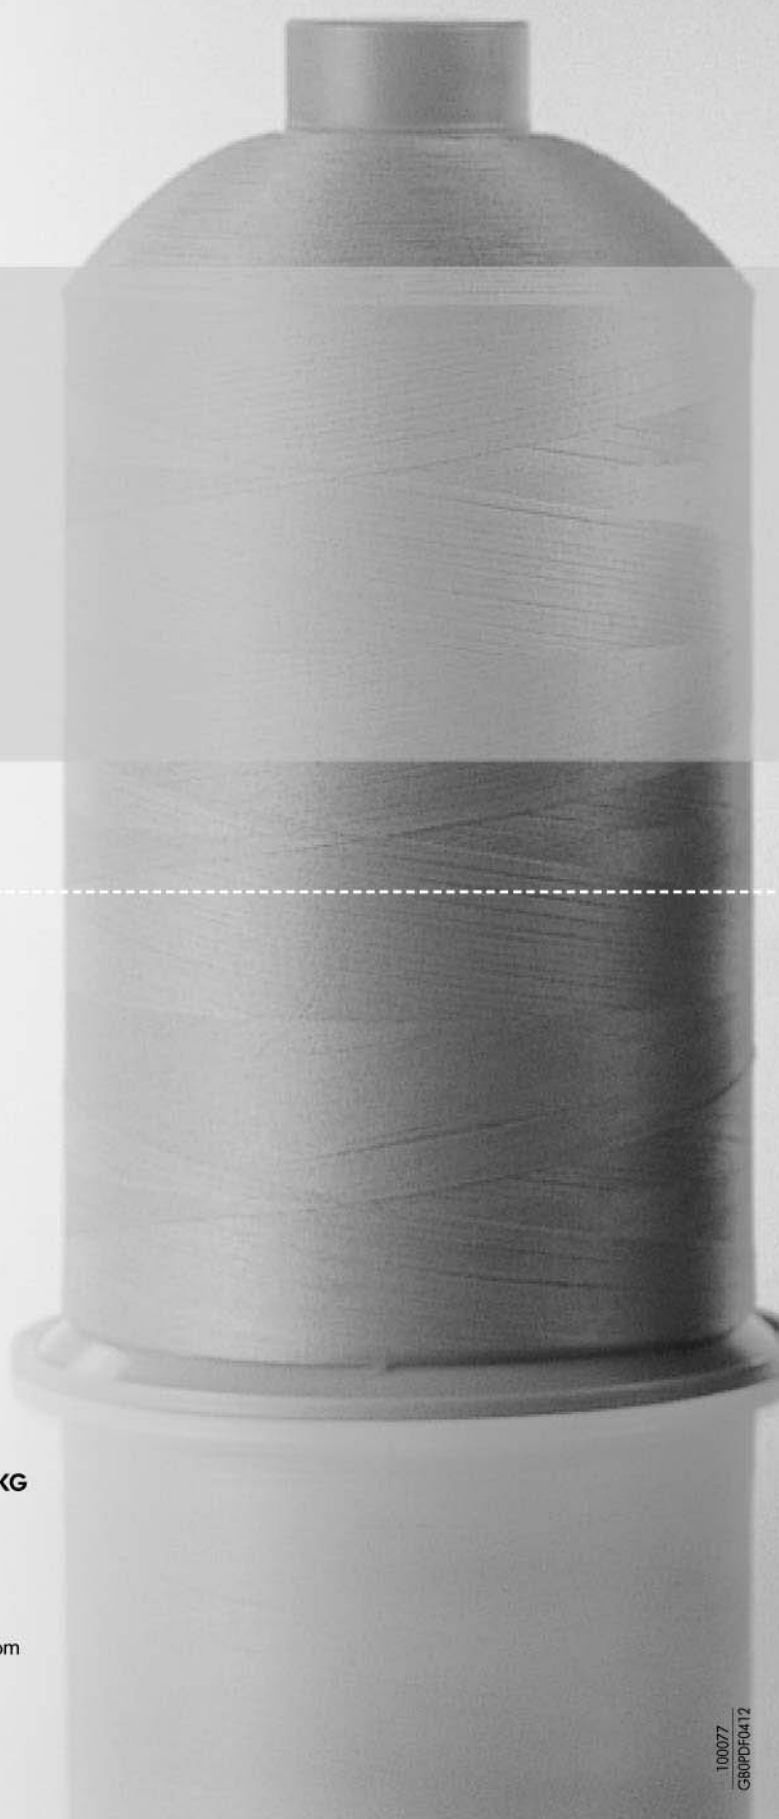

Top-level quality in connection with a responsible treatment of the environment
and its resources.

sabaTEX meets all the requirements of the Oeko-Tex Standard 100 and has been
awarded the corresponding certification.
