## Product Profile

Serafil 8-120, the all-purpose thread made of 100% PES multi-filaments, features an outstanding breaking strength and abrasion resistance. Further advantages are the well-balanced elongation behaviour, a good light and weather fastness and the high thermal resistance.

Serafil 8-120 not only meets the tough demands placed on a high-quality thread in the leather processing industry, in heavy fabrics and in safety-relevant parts, but also in day-to-day use on sewing machines.

AMANN fulfils such high quality standards through the use of carefully selected raw materials, new thread-friendly production machines and modern high-temperature dyeing processes. Because we want to produce the quality seam you expect.

Serafil 8-120 is available in a wide range of colours and sizes – also in water-repellent and bonded qualities.

### Fields of Application

#### Serafil 8

The functional strength for safety and load-carrying belts, for coarse ornamental seams on shoes and for heavy technical textiles.

#### Serafil 10, 15

As rustic coarse ornamental thread for shoes and leather and for heavy technical textiles.

#### Serafil 20

The universal sewing thread for heavy shoes, airbags, car seats, suitcases, leather and heavy fabrics.

**Serafil 30,40**

For shoes, car seats, upholstery, bags, leather and technical fabrics.

**Serafil 60,80**

For shoes, bags, leather, upholstery, zippers, gloves as well as for mattresses and multi-needle quilting.

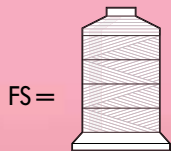

**Serafil 120**

The fine one for multi-needle quilting, clean room clothing and technical applications.

Versatile, robust, high-quality –  
if real strength is needed
